## Kline-Welsh Behavioral Health Foundation: The Sand Island Treatment Center

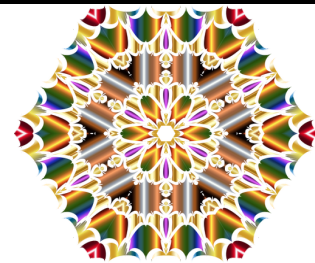

Sand Island Treatment Center has for more than 50 years offered treatment for substance abuse and co-occurring disorders. The average stay is eight months, with comprehensive outpatient and aftercare programs that typically result in a two-year commitment for residents who take advantage of all these offerings. The rehab is operated by the Kline-Welsh Behavioral Health Foundation. Sand Island Treatment Center's housing system is based on a graduation method where clients work their way to private rooms. The philosophy is that living in densely populated quarters encourages clients to move away from being self-centered and focus on the 12 steps.

## Kline-Welsh Behavioral Health Foundation: The Sand Island Treatment Center

Sand Island Treatment Center has for more than 50 years offered treatment for substance abuse and co-occurring disorders. The average stay is eight months, with comprehensive outpatient and aftercare programs that typically result in a two-year commitment for residents who take advantage of all these offerings. The rehab is operated by the Kline-Welsh Behavioral Health Foundation. Sand Island Treatment Center's housing system is based on a graduation method where clients work their way to private rooms. The philosophy is that living in densely populated quarters encourages clients to move away from being self-centered and focus on the 12 steps.
